

LUYA

Furniture · Interiors · Architecture

Made for your space.

LUYA is an Istanbul-based furniture, interiors and architecture brand developing timeless products, bespoke dimensions and project-specific spatial solutions for residential and contract environments.

LUYA at a glance

Positioning

Premium furniture, bespoke production, interiors and project solutions.

Base

Istanbul, Türkiye - serving international residential and contract enquiries.

Core promise

Furniture should fit your space - not the other way around. Standard dimensions can be adapted to the project where production allows, while preserving the product's design language and proportions.

Digital experience

LUYA SPACE allows visitors to draw a room, place products at real scale, test fit and move toward a bespoke-dimension enquiry.

Professional support

Technical sheets, product dimensions, material information, specification support and CAD/BIM requests where production files exist.

Capabilities

Furniture

Original furniture collections supported by real product dimensions, material information and multi-image product presentation.

Bespoke dimensions

Project-specific sizing is a core LUYA capability. The objective is not to tell a client that a product does not fit, but to evaluate whether a suitable producible dimension can be developed.

Interiors

Furniture, materials, circulation and spatial placement are developed as one design language.

Contract & Architecture

Residential, hospitality, workplace and commercial project enquiries can be evaluated with project-specific product and spatial solutions.

Materials & Finishes

The LUYA Material Library presents materials actually associated with products rather than generic colour promises.

Selected visual language

LUYA's visual direction is premium, architectural, restrained and realistic. Products are presented in contextual interiors as well as product-focused views. Geometry and material distribution are treated as canonical product identity and should not be casually reinterpreted.
